

#Fun With Blocks

You have been provided with an HTML file (index.html) and a basic CSS stylesheet (fun-with-blocks.css). When viewed through a web browser, the page renders as follows:

0
1
2
3
4
5
6
7
8
9

Without altering the HTML file, provide CSS stylesheets that can render the web page as depicted in each of the exercises below.

1. Stack

Create a style sheet that that displays the blocks "stacked" on top of one another.

2. In a Row

Create a style sheet that that displays the blocks in a row from left to right.

3. Steps

Create a style sheet that that displays the blocks descending in steps.

4. Pyramid

Create a style sheet that that displays the blocks as a pyramid. You can alter the HTML file to provide this solution.
